

Linux XFCE :

French Debian XFCE Screenshots

To get transparency throw the image mouse and image keyboard :

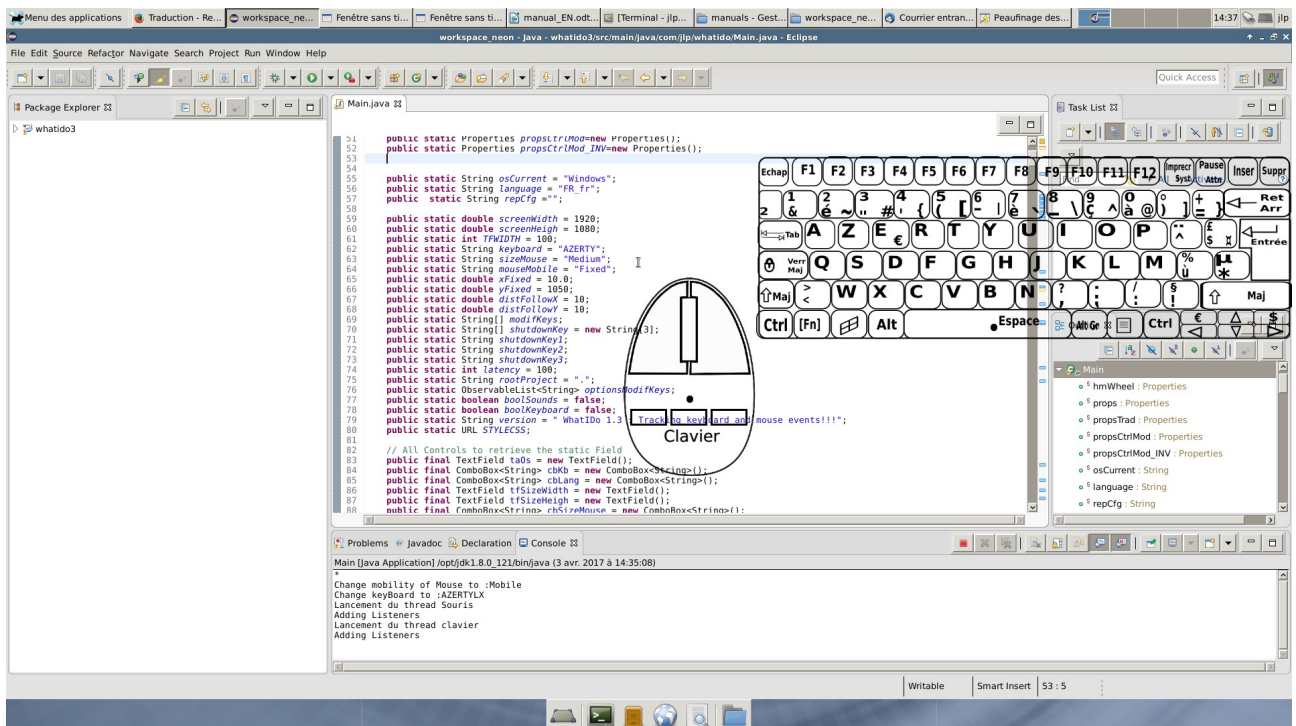

Applications Menu → Parameters → Window finishing (Peaufinage des Fenêtres) (

Give a little transparency  
( Just a little, a full  
transparency has undesirable  
border effects)

What you obtain :

Linux Debian KDE :  
No Configuration to do.

Windows 8 / 10  
No configuration to do.
